Detail King's Slick Stixxx are the Latest Detail Tool!

Pittsburgh, PA. - April 12, 2007 Slick Stixxx are a patent-pending detailing technology that utilizes a series of various straight and angled component handles along with 7 different component cleaning attachment heads. The Slick Stixxx can be used to clean tight, hard-to-reach areas that cannot easily be reached by hand or with conventional tools. The many different sizes and shapes of the handles and components make it possible to clean virtually anywhere on any type of vehicle.

Slick Stixxx are perfect to use when cleaning and detailing show cars, motorcycles, and anything that has an area that is hard to reach. They are safe to use on chrome, billet aluminum, powder coated surfaces, and painted surfaces as long as they are used as directed. The kit comes with ferrule connectors that can be used to connect the component handles for a longer reach.

The component handles are made of tempered aluminum coated with chemical resistant vinyl. The component heads are made from self-lubricating, non-marking, high-density plastic that is resistant to petroleum and chemicals. The butt-end caps are made from the same material of the component heads, so they keep the end of the component handles from scratching or damaging near-by surfaces.

Slick Stixxx are designed to be used only with Slick Rags or other cloth material wrapped around the component heads. Careful monitoring of the Slick Rag or cloth material should be done to make sure that the component head does not break through the rag because it could potentially leave marks on some finishes. You should also inspect the Slick Rag or cloth before each use for holes or thinning and

replace it as needed.

The entire Slick Rag that is supplied can be used so as one section gets dirty, all you need to do is slide the tool to a clean area of the rag and continue cleaning. You can also cut the Slick Rag to fit the component head and wrap something around it to keep it on, however the previous way will be less time consuming.

Each Slick Stixxx kit includes: 4 component handles, 7 component heads, 2 component ferrule connectors, 2 component butt-end caps, 1 Slick Rag, and 1 carrying bag. Cost: \$31.95 plus shipping.

For more information about the Slick Stixxx, check out the New Products Department on our Super Mall.
